About the Seminar

Today's reality of Higher education demands focus on the four Es of Expansion, Equity, Excellence and Employability. We need to enhance the GER, create new infrastructure, strengthen state universities and enhance teaching capacities. An equally important concern is to ensure gender parity, reach the unreached, bridge the urban rural divide and address the educational needs of all social groups towards attaining the goals of inclusive education. Expansion and equity is not enough if excellence does not become our watchword. Mandatory accreditation of institutions, their periodic assessments, enriching faculty resources and focus on research and innovation are the key interventions we need to nurture towards quality and excellence.
